Mobile App Engineer with hands-on experience building and shipping production-ready mobile applications using Flutter, and state management, skilled in payment integration, authentication systems, API integration, state management, clean architecture and debugging. Passionate about building reliable, scalable and user-focused mobile products from development through testing and deployment.

AREAS OF EXPERTISE

**Mobile Development**

- Flutter & Dart
- Android Development
- Responsive UI Development
- Cross-platform Applications
- App Performance Optimization

**Architecture & Engineering**

- Architecture & Engineering
- BLoC / Cubit
- Feature-based Architecture
- Dependency Injection
- Rest API Integration
- Error Handling & Debugging

**Backend & Services**

- REST APIs
- Firebase
- Supabase
- Cloud Functions
- Authentication
- Cloud Firestore
- Push Notifications
- Storage

**Payment & Integrations**

- Paystack Integration
- Flutterwave Integration
- Payment Verification
- Webhooks
- API Integration
- Secure Transaction Flows

**Tools & Deployment**

- Google Play Store
- Apple Store
- Git / GitHub / GitLab
- CI/CD
- Android Studio
- VS Code
- Postman

KEY ACHIEVEMENTS

- Built and shipped **InsurIQ**, a production Flutter application using Firebase, BLoC and Paystack payment infrastructure.
- Implemented secure payment initialization, verification and webbook flows using Firebase Cloud Functions and Paystack.
- Developed authenticating, onboarding, learning modules, quiz functionality, and payment-related features for a production app.
- Integrated backend APIs and third-party services into Flutter applications while handling loading, error and success states.
- Designed and implemented mobile applications using clean architecture and scalable feature-based structures.
- Developed **Fundedu**, a scholarship and opportunity discovery platform with Supabase, including authentication, personalization,
- Built **ClartAsk AI**, a task breakdown application using Flutter and Supabase, including authentication, personalization, task persistence and AI-powered task breakdowns.
- Concurrent building **SendBash**, a campus-first errand and transaction platform focused on request, payment, fulfillment and proof-of-completion.

PROFESSIONAL EXPERIENCE

Mobile Engineer — InsurIQ

- Developed production mobile features using Flutter and Dart.
- Integrated state management with BLoC and integrated Firebase (Auth, Firestore, Cloud Functions).
- Integrated Paystack payments including initialization, verification and webbook flows.
- Prepared and released application builds through the Google Play Store.
- Diagnosed and resolved production issues (Firebase Functions, App Check, permissions, deployment).
- Worked with Git branches and release workflows for feature development and production releases.

July 2026 – Present

Mobile Engineer — Fundedu

- Built Flutter features for scholarships, grants, internships and educational opportunities.
- Integrated Supabase authentication and storage.
- Implemented search, bookmarks, notifications and application flows.
- Integrated Firebase Cloud Messaging for push notifications.
- Prepared Android builds for testing and Play Store deployment.

Aug 2025 – Present

Mobile Engineer — ClartTask AI

- Built a Flutter task breakdown application using Supabase.
- Implemented authentication and onboarding flows.
- Developed task creation and persistence.
- Integrated AI-powered task breakdown functionality.
- Structured the app using clean architecture and feature-based organization.

July 2026 – Present

SELECTED PROJECTS

**InsurIQ**

An AI-Powered Gamified Insurance Learning Platform.

Flutter + Firebase + Paystack

**FundedU**

Designed a supabase platform.

Flutter + Supabase + Firebase

**ClartiTask AI**

Designed a supabase app.

A production app.

Flutter + Supabase

**SendBash**

Designed an errand & delivery platform.

Flutter + Supabase + Paystack

**FlowPayee**

Payment platform with OTP & passcode.

Flutter + Supabase – Termi

**Engagéme**

Designed a engagement platform.

Flutter + API Integration

EDUCATION & CERTIFICATIONS

**B.Sc. Computer Science**
(In View)

Tai Solarin Federal Univesity of Education, Ogun State

**Certifications** (Complete)

- Flutter & Dart (Udemy)
- Mobile Engineering with flutter (Udemy)

**Career Goal**

To grow a globally competitive **Mobile App Engineer**, building innovative and impactful mobile solutions.
